Current Employment

Organization : **Globussoft Pvt. Ltd , Bangalore**
Duration : 1+ year (from 23rd-august 2016 to 16th November 2017)
Designation : **Developer**

PROJECT DETAILS

1. **Project** : BIZINGA (An automation web based tool)
   Technology : MEAN(MongoDB, ExpressJs, AngularJs & NodeJs) stack
   Role : Developer
   Module : Backend to Front End (Beginning to End)
   Client : Mr. JD (United State)
   Descriptions : This project basically connects two or more web based apps and after getting information from one app sends to the next apps. The whole process of this web based tool is an automation in which after setting/selection data in one app (Trigger app) perform some decided action in action app. E.g, If the Trigger app is Google spread sheet and action app is BirdEye, automation between them will be get the data from selected **spreadsheet** and send to the **BirdEye,** like this there may be so many app which can be used as an action.
2. **Project** : Koboclicks (A chat app with contribution club feature)
   Technology : MEAN (MongoDB, ExpressJs, AngularJs & NodeJs) stack & Java
   Role : Backend Developer
   Module : Backend to Front End (Beginning to End)
   Client : Mr. Felix (Nigeria)
   Descriptions : This app is a kind of chat app with multiple features like single user chat, group chat, audio-video sharing and most ultimate feature is contribution club in the perspective of business with the app.
3. **Project** : Answerapp (A chat app with MCQ twist feature. **http://answerapp.online**)
   Technology : MEAN(MongoDB, ExpressJs, AngularJs & NodeJs) stack & Java
   Role : Backend Developer
   Module : Backend to Front End (Beginning to End)
   Client : Mr. Tomar (Israel)

Descriptions : This app is a kind of chat app with multiple features like single user chat and most ultimate feature is MCQ with some twist. Basically sender can send question to receiver with blur image, if the receiver gives correct answer he gets actual image else he gets next chance either he can buy some credits or request to next question.

4. **Project :** DialEureka (A people searching website**. https://dialeureka.com/)**
   Technology : Laravel & MySQL
